

# Decision Driving

## Liberty Mutual's Decision Driving™ training program helps managers and employees to reduce vehicle accidents.

**Liberty Mutual's Decision Driving™ program wins 2003 Arthur Quern Quality Award at RIMS**

Disability from injuries on the road can create significant costs for your business - thousands of dollars in employee medical bills and lost wages, lost productivity, and damage to your vehicles.

For more than 90 years, Liberty Mutual has been a trusted and valuable partner for firms seeking to improve their safety performance. Supported by the world-renowned Liberty Mutual Research Institute for Safety, our safety consultants have provided thousands of companies with analysis, recommendations and strategies that have been the driving force for companies to reduce workplace injuries.

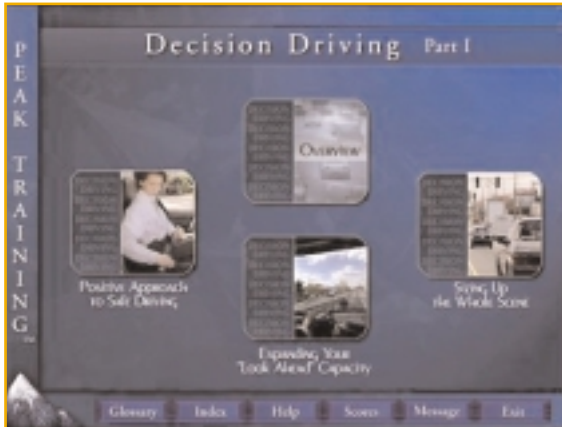

As part of that dedication, Liberty Mutual created an interactive CD-ROM based training program to help drivers learn safer more effective methods while on the road.

### Product Description:

A completely interactive two-CD set with multiple training modules that combine video and animated examples to guide the learner through the five steps of the Decision Driving(tm) program. The training is designed for drivers of both trucks and automobiles and focuses on a wide range of topics including, taking a positive approach to safe driving, to expanding your "Look ahead" capacity and sizing up the whole scene. Relevant issues such as city/highway driving, merging traffic, pedestrians and braking are covered in depth and each course has its own self-administered test to help the driver monitor their progress. While allowing learners to proceed at their own pace, it also allows the employees' managers to track their success with an administrative review section. Managers can track success rates by both lesson and individual questions, indicating future training needs.

### Features:

- Fully narrated, highly interactive CD-ROM training
- Learning management system
- Full-motion, full-screen video
- VCR buttons guide user through each step
- Easy to navigate

## Benefits to your company:

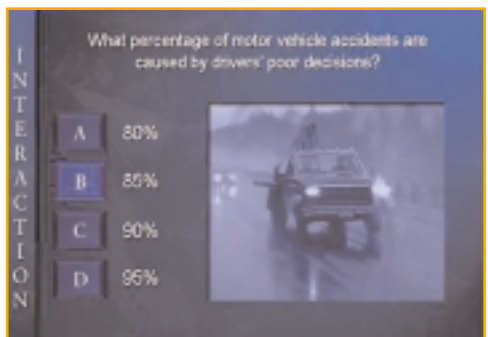

Programs utilize adult learning methodologies to increase each student's comprehension and retention. Every program features interactive material that is tied to the individual responses of students. The result is personalized training that successfully transfers information from short-term to long-term memory.

- Improve worker receptiveness
- Improve comprehension and retention
- Increase productivity and reduce overtime costs
- Improve time management
- Make more efficient use of personnel
- Decrease paperwork with automated recordkeeping
- Offer customization capabilities
- Reduce vehicle accidents through positive learning experience

## System Requirements:

- No proprietary hardware required
- Pentium 166 MHz PC w/MMX
- 32 MB RAM
- Windows 95 or NT 4.0 later
- Windows compatible soundcard
- Windows compatible MPEG hardware decoder card or MPEG software
- Speakers or headphones
- Mouse

Also available in network and web versions.
